

USAC TECHNICAL UPDATE – TB2017-NM001

NATIONAL MIDGET SERIES

Date: APRIL 1, 2017

Date Effective: April 1, 2017

TITLE: Ignition and Electronic Equipment

417

G. The use of electronic logic processors may be used to collect data from RPM, water temperature, and oil pressure only. Any function of the race car and/or any system for gathering continuous data from any other function of the race car is strictly prohibited for exception of approved ignition.

H. Approved items for use to collect/record data other than electronic ignition system must meet (417 G) limits.
